RMIS Report Insights

What we are seeing

- The visibility and importance of risk at the enterprise level continue to grow
- First-time RMIS buyers account for approximately 50% of new RMIS sales
- We have seen a significant increase in organizations with less than \$1b in revenue adapting RMIS solutions
- Expanded RMIS use beyond Claims - to Policy, Renewal, Exposure Mgmt

An overview...

The easy-to-use, AI-driven RMIS built for the modern risk manager

Safety and Loss Control

Incident Workflow Automation

Claims Management

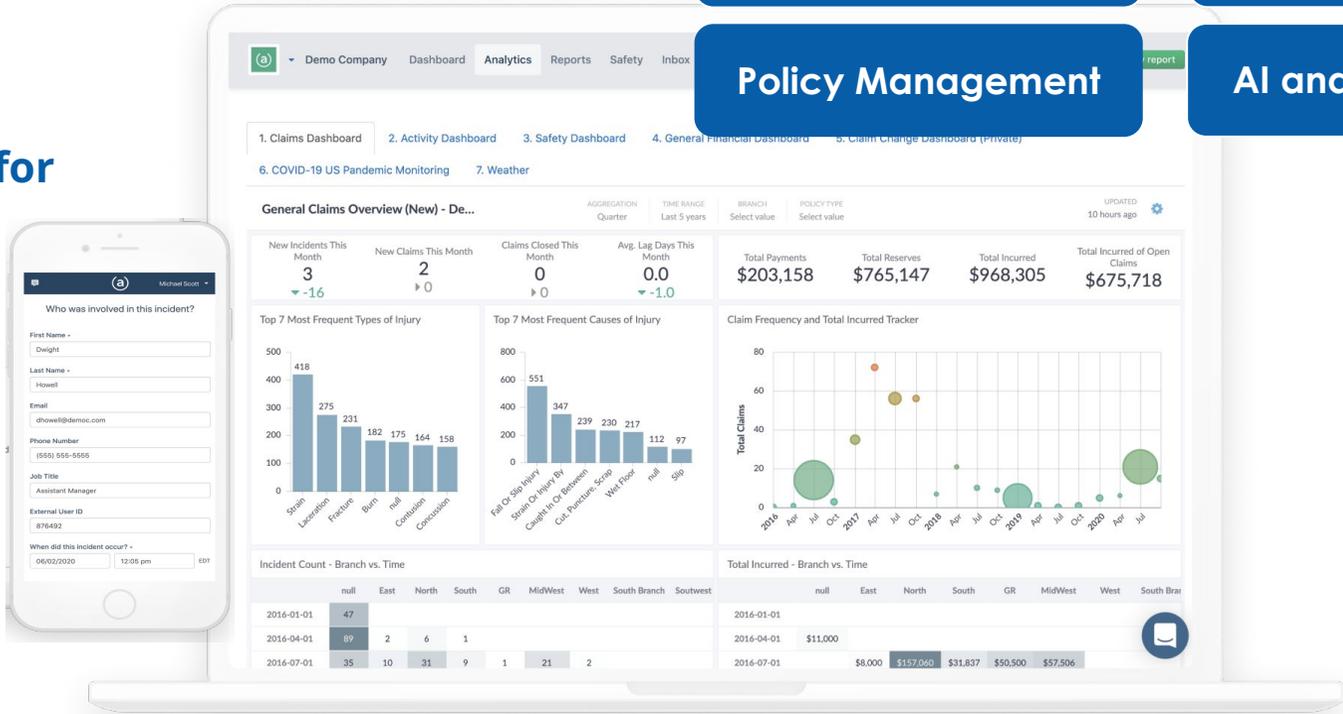

Policy Management

Assets and Exposures

Claims Data Pipeline

Reporting and Analytics

AI and Connectivity

Aclaimant specializes in first-time buyers

Why are More First Time Buyers Investing in RMIS?

- **Cost savings and ROI are proven**
(~20% reduction in TCOR over 5 years)
- **Data-driven insights are now expected**
by executives
- **More buyers realize the value**
(mid-market +)
- **Regulatory pressure has increased**
- **Technology has matured**
- **Scalable SaaS models** make RMIS
accessible to more firms.

Top Objections First-time RMIS Buyers Raise

Top objections include:

- Cost
- Complexity
- Integration
- Change Management

How can these objections be addressed?

- Demonstrating ROI
- Simplifying deployment
- Ensuring seamless integrations
- Providing strong onboarding and support

The RMIS Blueprint™: A Roadmap to Success

A structured, AI-enabled framework developed by **Redhand Advisors** to help organizations define needs, evaluate vendors, and select the best-fit **Risk Management Information System (RMIS)**.

Powered by Redhand's proprietary tools and market intelligence, the Blueprint streamlines every step—from discovery to decision.

Why It Matters

- **Clarifies Complex Requirements** – Translates stakeholder needs into clear, documented functional and technical priorities.
- **Removes Guesswork & Bias** – Uses independent, data-driven scoring based on Redhand's RMIS Report and vendor database.
- **Accelerates the Selection Process** – Reduces months of uncertainty with automated intake, evaluation, and comparison tools.
- **Improves Adoption & ROI** – Ensures system capabilities align with business goals, workflows, and user expectations.
- **Built for First-Time & Evolving Buyers** – Delivers structure, confidence, and transparency for any organization modernizing its RMIS.

Benefits to Risk Managers

RISK MANAGEMENT HERO!

Jane, our risk manager, faced the tidal wave of disconnected data. Trends were hidden and threats lurked in siloed systems costing valuable time...

THE BREAKTHROUGH BEGINS!

Jane's frustration built and built. She had enough. Her old systems were a tangled mess...but then, a powerful new ALLY appeared - Aclaimant!

Benefits to Risk Managers, Continued

DATA CHANGES EVERYTHING!

Aclaimant brought all of Jane's data into one place - claims, risk, insurance, premiums, even safety. The chaos vanished, and patterns started to become clear!

ACLAIMANT: THE VISION UNLOCKED!

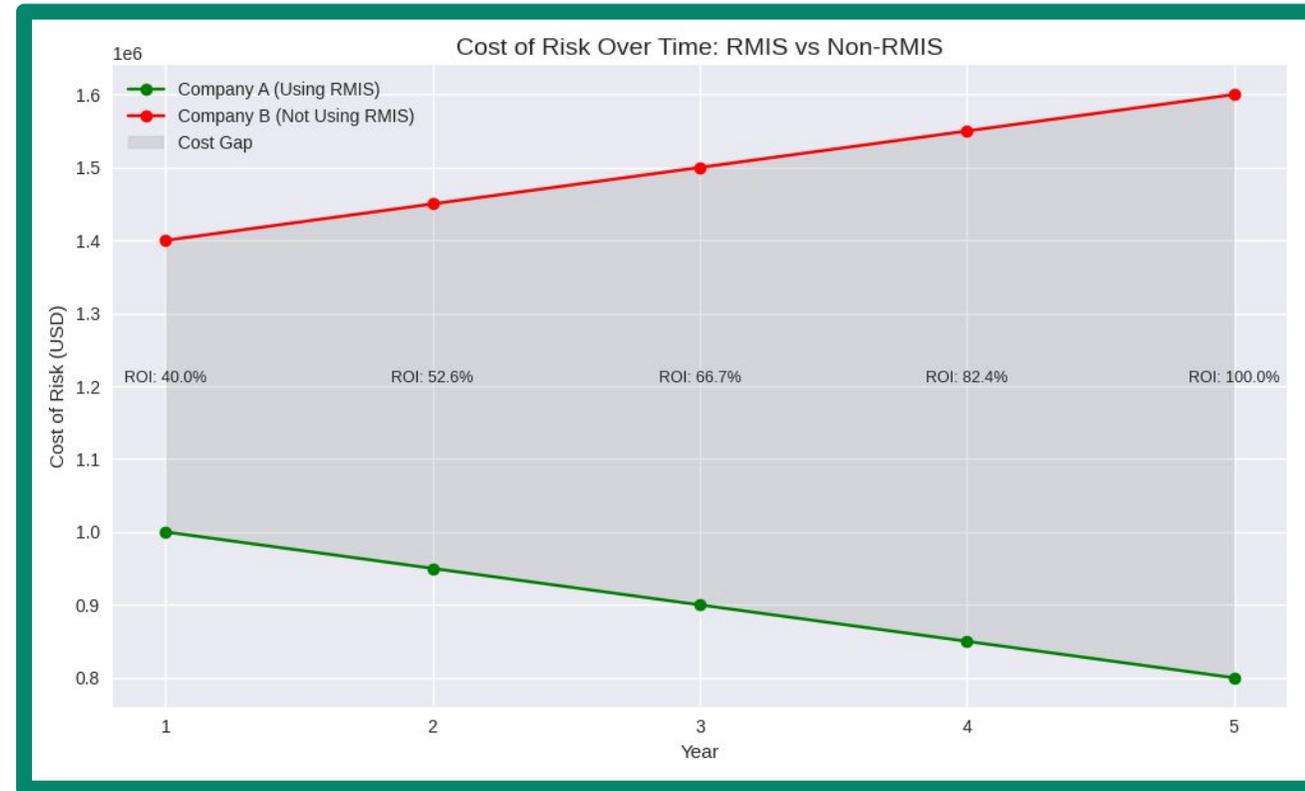

With Aclaimant, Jane didn't just manage risk she mastered it. She became the ultimate business protector, turning data into her greatest superpower.

Cost of RMIS: How to Think About RMIS ROI

RMIS can reduce total cost of risk by ~20% over a 5-year horizon

- Improved claims management
- Data-driven decision making
- Workflow automation
- Regulatory & compliance efficiency
- Predictive & preventive risk controls
- Vendor & policy optimization
- Employee engagement & safety

20% reduction in total cost of risk over 5 years
\$800K annual savings by Year 5 (example mid-sized company)
2x ROI within 3 years

How to Align with your Executive Team

- Start with alignment to strategic goals, not software
- Communicate in their language - use executive metrics to discuss results
- Highlight competitive advantage
- Tailor to each executive
 - **CFO:** ROI, cost savings, insurance spend optimization.
 - **COO:** Efficiency, workflow automation, fewer disruptions.
 - **General Counsel/Compliance Officer:** Compliance, audit readiness, litigation avoidance.
 - **CEO:** Strategic resilience, reputation, shareholder confidence.

What has Worked? Feedback from Clients

- ✓ **Start discussions early in the process** with the Exec team
- ✓ **Quantify ROI**
- ✓ **Use case studies**
- ✓ **Emphasize scalability**
- ✓ **Highlight compliance**
- ✓ **Show quick wins**
- ✗ Don't lead with technical features (APIs, data mapping) — ***executives care about outcomes.***
- ✗ Don't frame it as “nice-to-have” — ***position it as mission-critical.***
- ✗ Don't ignore adoption — ***address change management and training upfront.***
- ✗ Don't over promise AI “magic” — ***focus on practical, proven automation and analytics.***

Aclaimant Case Study - Alignment with Executive Team

RISK MANAGER - LARGE PEO

- **Strategic positioning:** The Risk Manager made a RMIS platform central to his role and success plan during hiring.
- **Exec leadership alignment:** Educated the CEO, CFO, and GC on how RMIS would deliver reporting, controls, and results.
- **Rapid execution:** With full leadership support, began onboarding the solution within 6 months of his start date

“Getting Scope Right”: Why First Implementations Succeed or Fail

BEFORE IMPLEMENTATION

- The number one reason implementations fail isn't the technology — it's misaligned scope.
- Think of scope as our guardrails. It keeps us focused, prevents scope creep, and ensures we deliver value early
- Focusing on the problem to be solved and ensuring that this is documented is essential to success

Aclaimant Case Study - Getting Scope Right

RISK MANAGER - LARGE STAFFING FIRM

- **Prioritized scope:** Began with the most pressing needs — incident reporting and claim visibility — before expanding.
- **Phased enhancements:** Added OSHA reporting, carrier feeds, safety modules, and data sources step-by-step.
- **Strategic delivery:** Balanced a long-term RMIS vision with incremental value, ensuring stakeholder alignment and measurable progress.

The 5 Elements of a Great RMIS Implementation

DURING AND AFTER IMPLEMENTATION

1. Find the **right partner** to be your guide
2. **Clear vision on problem** being solved and scope to solve it
3. Clear **understanding of who needs to be involved internally** (champion, executive sponsorship + influencers)
4. **Data and systems** access scoped early
5. **Clean plan** for go live, rollout, training and ongoing management

Aclaimant Case Study - Driving a Successful Implementation

RISK MANAGER - MID-SIZED CONSTRUCTION COMPANY

- **Strategic alignment:** Partnered with Aclaimant, engaged key executives, and coordinated early with the CTO for system connectivity.
- **Phased rollout:** Spent 30 days redesigning processes, 30 days testing in sandbox, and secured internal sign-off 30 days later.
- **Successful implementation:** Delivered training, achieved full team buy-in, and launched the RMIS exactly as envisioned, on time.

Q&A

Wrap Up - Benefits to Risk Managers

ACCLAIMANT: THE VISION UNLOCKED!

EUREKA!
YES! I see everything

With Aclaimant, Jane didn't just manage risk she mastered it. She became the ultimate business protector, turning data into her greatest superpower.

ACCLAIMANT: THE SAFETY HERO!
SAFETY SUPERPOWERS!

Incidents & Claim Costs REDUCED!

Incidents REDUCED!

Now, John spots risks before they become accidents. He PREVENTS accidents, saves money & PROTECTS his team. Aclaimant: The Future of Safety and Risk Management!
